Fabrics & Samples

The fabrics shown in this brochure are carefully chosen and tested on our products. We work with these brands for their quality and are known world wide. Samples can be requested at the specific fabric brand or at Bogaerts Label. Note that fabric brands improve and change their color collections now and then which leads to the fact that some colors aren't always available in the future.

COM

It is possible to use other materials & fabrics for our products, let us know what you would like to apply and we will see if the quality is suited for our furniture. For this process the customer needs to send in a sample fabric of 1 meter for testing. If you would like to use your own material (COM) this is possible in negotiation. However, Bogaerts Label can not guarantee that each other fabric is suited for these applications and will only be applied at the customers risk.

If you need samples from any fabric in this brochure please feel free to contact us via info@bogaertslabel.com.
